

MFB Organic Nutrient Spray
 Beyond just nutrients, MFBs formula targets both primary & secondary metabolism in plants. Improved metabolism results in balanced & better nutrient uptake. The outcome is healthier, more productive plants that are more resistant to virus & abiotic stressors.

MFB是一种含液态氨基酸的有机质营养液，能够同时为土壤微生物菌本身及植物提供营养。MFB对植物本身有促进作用，能增加植物的抗逆性，增加植物抗病性，提高作物产量。经由特殊菌种产生的二次代谢副产物，令植物体内的生化作用达到平衡，让植物保持健康，维持高免疫力。

- Metabolism balance between primary & secondary results in healthier & more productive plants
- SOLUBLE NPK+ NUTRIENTS Solubilized nutrients allows faster foliar feed absorption, and improved results
- Enhanced rhizosphere will allow improved nutrient uptake in the root system

100% ORGANIC NUTRIENTS SPRAY

Works best on soil based plants

- Enhance Plant Metabolism
- SOLUBLE NPK+ NUTRIENTS Ease of absorption
- Better Roots Rhizosphere

800 ML

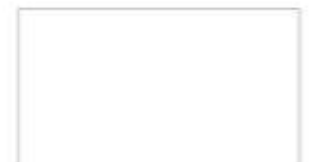

Application
 - Shake before use
 - Mist spray on top of leaf surface, once a week, in the morning.

Storage
 - Store in cool place
 - Keep out of reach of children

使用方式
 - 使用前摇匀
 - 每隔七天，在早晨喷在叶上

储存方式
 - 储放在阴凉的地方
 - 请勿存放于儿童可触及之地点

Stronger plants means resistance to virus, and external factors (e.g. temperature, water, light)
 健康的植物，有更强的抗病性，提高对环境变数的免疫力，如温度，缺水，灯光不足

Metabolism balance results in comprehensive nutrient uptake, and absorption from roots, giving healthy & productive plants
 提高代谢取得完善的营养吸收，助于更健康的植物

Foliar feed is the technique of applying liquid fertilizer directly through leaves. Absorption of essential elements works through leaf stomata, epidermis, and bark.
https://en.wikipedia.org/wiki/Foliar_feeding
 MFB contains essential elements in soluble form for quick absorption to effect faster results
 植叶吸收，已是科学认定的营养吸收方法，是通过植物叶子，杆等部位细胞吸收方法。MFB已含液态氨基酸的有机质营养液，利用植叶吸收，更快速吸收营养成分

With enhanced nutrient uptake, root network (rhizosphere) will expand to support demand.
 以便维持提升营养吸收量，植物根部也会扩散的更多，更米。

100% Organic – 0% chemical. Do not mix the spray with chemical spray. Effectiveness will be loss.
 100%有机，0%化学物
 若缠扎化学物喷液，产品会失效
